when it comes to strategy the mistake most managers make is thinking they have one when they don t joan magretta author of the bestselling book understanding michael porter has teamed up with illustrator emile holmewood to capture essential strategy concepts in a short easy to

understand graphic format here you ll find the classic porter frameworks industry structure and the five forces competitive advantage and the value chain as well as a set of practical tests to apply in evaluating existing strategies or developing new ones you ll also learn porter s thinking about critical issues such as scale goal setting sustainability and disruption with a relatable cast of characters a deadlocked team of managers calls in professor porter to help them devise a new strategy this book brings a sense of fun to a serious subject it will help you quickly grasp the fundamentals of strategy whether you re a seasoned strategist looking to cut through all the new buzzwords or a new manager about to lead your first strategy meeting

strategy journeys starts from the premise that strategic planning suffers from a bad press it can be seen as complex technical remote from the day to day reality of an organisation undertaken by an elite specialist executive group producing threatening changes whose rationale is barely understood or perhaps worse still having no worthwhile impact at all for many senior executives strategic planning is too daunting a task which is why they often seek help from those with the expertise to guide the process they have a severe lack of confidence in their own ability to design plan and implement such an important and major project yet organisations have never had greater need for a flexible resilient and engaging approach to strategic planning than now how do those leading an organisation know where to start what approach to take and how to go about the process of strategic planning david booth aims to help them by demystifying the concept and propounding a first principles approach to developing a strategic plan within the context of the individual organisation and with the flexibility to adapt the process to focus on what really matters he suggests the key questions that should be asked when considering embarking on a strategic planning journey to help design and guide the process

the 2nd edition of strategy in practice presents a practitioner focused approach to strategy it is increasingly recognised that the ability to adapt classic formulas to changing circumstances and develop fast sound strategic thinking is what differentiates the successful corporate leader developed from experience in industry this successful text will include an instructor site with powerpoint slides extra examples and exercises and links highlighting changing business practice while rigorously founded on current thinking and theoretical concepts in the field of strategic management it aims to provide the strategy practitioner with a systematic and insight driven approach to strategic thinking establish and translate the relevance of strategy theory to its application in the practice field lead the reader through the strategic thinking process beginning with the formulation of compelling and clearly articulated strategic questions that set the scene for practical issues provide tools of strategic analysis in combination with informed intuition to understand the strategic landscape

to make the best decisions you need the best information however because most issues in game theory are grey nearly all recent research has been carried out using a simplified method that considers grey systems as white ones this often results in a forecasting function that is far from satisfactory when applied to many real situations grey ga

plan to win leaders guide to creating breakthrough business strategy someone very wise once said the world is not short on strategy its short on execution and the evidence bears this out as most business plans whether for a start up or a mature business end up stacked on office bookshelves or buried in file drawers using his vast experience of guiding companies of all sizes throughout the world peter von braun knows that the key to developing a truly winning business strategy is to follows a disciplined and scientific process that quickly cuts to the important issues and includes the managers who are critical to executing the plan planning and execution are interdependent which is why planners and implementers need to work together from the beginning of plan development plan to win outlines a clear step by step process using the four market tested principles of successful strategies and helps the reader avoid the most common mistakes of strategic business planning as a serious student of military strategy von braun draws upon the great prussian strategic thinker karl von clausewitz to provide the first

three principles 1 concentrate on the most important goal 2 commit sufficient resources up front to ensure success and 3 continue to focus on the goal until success is achieved to these three the author peter von braun adds the fourth imperative bring your key people together in the process of creating a business plan that will be understood committed to and most importantly acted upon that's not to say the strategy should be a big group think exercise the key is to follow a disciplined and scientific process that can cut through the unimportant information and focus on the meat of the opportunity the author guides the reader through the step by step process of identifying the core issues and developing the winning strategy using the first round strategic framework created during a real world case study creating a strategic plan is hard work but by following the principles put forth in this book effectively and thoroughly success is far more likely this is a terrific book for business owners and executives division managers strategic planners young executives interested in finding tools to further their careers students and those interested in strategy
