era of independence after world war ii when deep internal tensions exploded into large scale massacres in the first group of essays anderson considers how power was imagined in traditional javanese society and how these imaginings shaped indonesia s modern politics other essays focus on the significance of the incongruences between the egalitarian ironizing national language through which modern indonesia has been imagined and the powerful influence of the hierarchical authoritarian javanese official culture finally two essays on consciousness illuminate the crucial eras before and after the rise of indonesia s nationalist movement one reflects on javanese intellectuals phantasmagoric efforts to keep imagining java as the island was overrun by colonial capitalism and absorbed into the huge heterogeneous netherlands east indies the second traces the transition from old culture to new nation through the autobiography of an eminent javanese first generation nationalist politician

in 1983 benedict anderson's imagined communities revolutionized the anthropology of nationalism anderson argued that print capitalism fostered nations as imagined communities in a modular form that became the culture of modernity now in represented communities john d kelly and martha kaplan offer an extensive and devastating critique of anderson's depictions of colonial history his comparative method and his political anthropology the authors build a forceful argument around events in fiji from world war ii to the 2000 coups showing how focus on imagined communities underestimates colonial history and obscures the struggle over legal rights and political representation in postcolonial nation states they show that the self-determining nation state actually emerged with the postwar construction of the united nations fundamentally changing the politics of representation sophisticated and impassioned this book will further anthropology's contribution to the understanding of contemporary nationalisms

how did the nationalisms of latin america's many countries elaborated in everything from history and fiction to cookery arise from their common backgrounds in the spanish and portuguese empires and their similar populations of mixed european native and african origins beyond imagined communities reading and writing the nation in nineteenth century latin america discards one answer and provides a rich collection of others these essays began as a critique of the argument by benedict anderson's highly influential book imagined communities reflections on the origin and spread of nationalism anderson traces latin american nationalisms to local circulation of colonial newspapers and tours of duty of colonial administrators but this book shows the limited validity of these arguments instead beyond imagined communities shows how more diverse cultural influences shaped latin american nationalisms four historians examine social situations françois xavier guerra studies various forms of political communication tulio halperín donghi political parties sarah c chambers the feminine world of salons and andrew kirkendall the institutions of higher education that trained the new administrators next four critics examine production of cultural objects fernando unzueta investigates novels sara castro klarén archeology and folklore gustavo verdesio suppression of unwanted archeological evidence and beatriz gonzález stephan national literary histories and international expositions
